OBJECTIVE

Full-stack software developer with a business background and AI development certification, **seeking an entry-level Technical Product Manager role** to leverage technical expertise, business acumen, and a user-focused mindset to deliver impactful, scalable products.

PROFESSIONAL EXPERIENCE

Plisca (M) Sdn. Bhd, Full-Stack Software Developer, Selangor, Malaysia

04/2022 - 11/2024

Key Achievements

Delivered software products for government clients through full-stack development, cross-functional collaboration, and iterative delivery—gaining expertise in product thinking, stakeholder management, and user advocacy.

- Developed and presented a near-complete application tracking system; the client estimated it could potentially **reduce their workload by at least 60%**, recognising the system's impact on operational efficiency.
- Prepared user manuals and deployed systems to staging environments for client evaluation, ensuring ease of handoff and long-term usability.
- Collaborated with business analysts to write and refine detailed functionality requirements in JIRA, ensuring clarity and alignment across the development team.
- Conducted customer interviews and delivered training for a secure geospatial platform; created a 72-page technical guide after identifying user comprehension gaps to drive adoption and retention.
- Facilitated user acceptance testing by scripting and conducting test cases with stakeholders — resulting in **successful sign-off** and positive client retention.

EDUCATION

The University of Manchester, Bachelor of Arts in Economics and Social Studies

(Major in Business Studies and Economics), Manchester, UK

09/2014 - 06/2017

Leadership Award

- Earned a Bronze Award in the Manchester Leadership Programme for community and leadership contributions (2016).
