OBJECTIVE

Full-stack Software Developer with 3+ years of Python experience, holding an IBM AI Developer Professional Certificate, seeking to specialise in AI engineering.

PROFESSIONAL EXPERIENCE

Plisca (M) Sdn. Bhd, Full-Stack Software Developer, Selangor, Malaysia

09/2022 - 11/2024

Key Achievements

Delivered software products for government clients by combining full-stack development with cross-functional collaboration, client engagement, and iterative product delivery.

- Built and deployed PHP/Laravel & PostgreSQL app tracking system, automating data workflows, **reducing client workload by an estimated 60%**.
- Developed scalable backend systems (Django, Laravel) & dynamic UIs (Angular, Ionic).
- Collaborated with business analysts to write and refine detailed functionality requirements in JIRA, ensuring clarity and alignment across the development team.
- Led geospatial platform maintenance using open-source GIS tools such as GeoNode, GeoServer, PostGIS, and MapStore.
- Conducted user acceptance testing with stakeholders, **successfully achieving full client sign-off**.

EDUCATION

**The University of Manchester, Bachelor of Arts in Economics and Social Studies
(Major in Business Studies and Economics), Manchester, UK**

09/2014 - 06/2017

Leadership Award

- Earned a Bronze Award in the Manchester Leadership Programme for community and leadership contributions (2016).

TECHNICAL SKILLS

Artificial intelligence (AI): Generative AI, Large Language Models (LLMs), Prompt Engineering, Python

Backend Development: RESTful APIs, Django, Flask, Node.js, PHP, Laravel

Frontend Development: HTML, CSS, JavaScript, Angular, Ionic, Bootstrap, jQuery

Databases & Spatial Systems: SQL, PostgreSQL, PostGIS, GeoServer, GeoNode, MapStore

DevOps & Tools: Docker, CI/CD, Git

PROJECT & DELIVERY SKILLS

Leadership & Strategy: Product Lifecycle Management, Strategic Thinking, Stakeholder Engagement, Customer Interviews

Execution & Delivery: Agile Methodologies, JIRA, Documentation, Problem-Solving, Presentation
